DETAILED ACTION

1. Claims 1-21 are pending.

Election/Restrictions

2. Claims 1, 6, 11, and 13 are generic to the following disclosed patentably distinct species:

- A. DNA-binding proteins or RNA primers (claim 1);
- B. Leukemia, lung cancer or melanoma (claim 6);
- C. RNA polymerases, transcription factors, activators, repressors or regulatory proteins (claim 11);
- D. RNA polymerase-binding elements, transcription factor-binding elements, activator-binding elements, repressor-binding elements, GC-rich regions or single-stranded nucleotide protein-binding elements.

The species are independent or distinct because they are drawn to compositions with distinct structure, mode of action and function.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from each of the above groups A to D, even though this requirement is traversed.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is

allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. This application contains claims directed to the following patentably distinct species:

- A. From about 2 to 40 (claim 14) or from about 7 to 25 (claim 15) bases long;
- B. From about 5 to 40 (claim 3) or from about 7 to 25 (claim 4) bases long

The species are independent or distinct because they are drawn to compositions with distinct structures.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from each group A and B for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 2 are generic for group A and claims 12 and 13 are generic for group B.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The species election is proper because they are drawn to distinct compositions that require different searches in the patent and non-patent literature, and a search and examination of anything more than one of the above-designated species would be a serious burden for the examiner.

5. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ileana Popa whose telephone number is 571-272-5546. The examiner can normally be reached on 9:00 am-5:30 pm.
